

Meeting Notes GSWA Stormwater sub-committee

Feb. 18, 2013

Present: Lesley Flowers, John Lindsay, Elaine Porter

Recommendations for the GSWA meeting February 25:

- That the GSWA support and encourage city council to declare a moratorium on development or enact an interim control by-law until watershed studies have been done and the lake capacity study results are known.
- That GSWA host an educational event called : Our Lakes in Danger : What science has to say! What action is needed! Approach local scientists to present the dangers of storm water to our lakes and rivers, best practices for a solution to the storm water problem and practical action that can be taken. Find ways to get out as many city councillors as possible.

April will be the target month.

- That GSWA develop a budget presentation to the City of Greater Sudbury that will convince council to support best practice storm water management by allotting sufficient money to enable best practice as opposed to stop gap temporary measures.
